# Pressrelease

Nyhamnsläge May 13<sup>th</sup> 2011

Josab International AB (publ):

## Josab Aqualite™ System installed in Rigaud, Haiti

A new water kiosk opened the 8<sup>th</sup> of May this year, in the community of Rigaud in Haiti. It is equipped with a Josab Aqualite™ System. The unit was donated to the organization “Star of hope” last December by Gustaf Söderberg, a young Swedish man whom during 2010, raised money to buy the machine with the aim to provide safe drinking water to the people of Rigaud.

More than 700 people were present at the inaugural ceremony. Pupils from the local school and their parents were the first beneficiaries of the clean drinking water. For a long time, the community of Rigaud lacked safe drinking water exposing them to the cholera epidemic that has already taken more than 5000 lives in Haiti.

## Pressrelease

During the day, children and parents had the opportunity to drink safe drinking water, purified by the Josab Aqualite™ System, for the first time and many people from the community also came to fill gallons and buckets of purified water to take home.
