

CAPACITY
200 lph

POWER
20,20 Watt per produced liter

WATER TANK
100 liters

WD5A

All of JOSAB's Ecological water vending machines can be installed in any location with electricity and water supply. It is simple to install and easy to maintain. Users only need to put in the corresponding amount of coins or swipe the Smart / RF ID card according to the quantity of water they need. In this way water will be saved and customers are ensured fresh water at any time.

The low price-performance ratio of the water is provided, the technique of water treatment of this machine is complete and mature, ensuring that the quality of finished water meets the WHO standard.

Coin calibration is done for each currency to set up the programming logic to dispense water according to the local requirements.

- Combined water purification and vending machine
- The water purification system is based on JOSAB's Ecological Aqualite™ System and a UV Sterilizer that meets the WHO's standards for drinking water
- Capacity of 200 LPH 24/7
- Cold drinking water with a storage tank of 100 liters
- Compact Fiber-Reinforced Plastic (FRP) makes the cabinet model easy to install and operate
- Dispensing possible with Cash card or coins
- Electrical or generator operated dispensing system
- Remote monitoring system
- Water treatment technology can be changed/adjusted depending on raw water quality.
